

# Illicit Fentanyl

## What is Fentanyl?

- Fentanyl is a powerful synthetic (human-made) opioid.
- It is 50x stronger than heroin & 100x stronger than morphine.
- Fentanyl is commonly found in street drugs, such as heroin, cocaine, Xanax, and Adderall.

## Beware of Fentanyl Poisoning

**Fake Pill Alert!** Even pills that look like real prescriptions can be counterfeit and contain lethal amounts of fentanyl.

**Illicit fentanyl poisoning is the #1 cause of overdose death.**

For for information visit [cwc.ngo](http://cwc.ngo)

**This small amount of fentanyl is more than enough to be lethal.**

## How to Protect Yourself:

- Avoid illicit drugs.
- **Carry Narcan!**
- Be cautious when handling unknown substances.
- Seek help immediately if you suspect an overdose.

## If you use illicit drugs:

- Use fentanyl test strips (know results aren't always accurate).
- Never reuse or share needles.
- Never use alone!
- **Carry Narcan!**
